9. Conducting research for new insights and innovative solutions to health problems	x	x			x	P	P	
10. Communicating effectively with public health constituencies in oral and written forms		x	x	x	x	x	P	

X: Course provides content and experiences that contribute to development of the competencies

P: Course provides opportunities for learning experiences that contribute to development of one or more competency. Specific experiences vary by student.

Notes:

The PHHP Core Competencies for graduates of the MPH degree program are derived, with small modifications, from the 10 Essential Public Health Services (1994).

PHC 6050: Statistical Methods for Health Sciences I

PHC 6001: Principles of Epidemiology

PHC 6102: Introduction to Public Health Administrative Systems

PHC 6313: Environmental Health Concepts in Public Health

PHC 6406: Psychological, Behavioral, and Social Issues in Public Health

PHC 6931: Seminar in Contemporary Public Health Issues is a one credit required course that offers opportunities to illustrate and strengthen the core competencies, and to develop a written and oral report that integrates knowledge and skills across the five public health concentrations.

PHC 6946: All MPH students are required to complete an internship with a public health or related agency. While each internship involves different goals and activities, all of them provide opportunities for students to enrich and expand on one or more of the MPH core competencies.
